● LAWN MOWERS - FRIENDLY ROBOTICS

The RoboMower is the next step in mowing evolution. The RoboMower is a fully autonomous lawn mower that is designed to autonomously mow your lawn simply by pressing a button. The RoboMower has a full 21-inch width of cut, and can handle mowing the same thickness and heights of grass that a traditional gas walk mower can handle. The RoboMower is a cut-on-demand mower, meaning you choose when and how often to mow.

It features a cutting system that delivers a full 5.5 HP equivalent power at the blade. It is a dedicated mulching mower that mulches far better than a traditional mower because of the Triple-Chamber-Mulching system with a full 5800-RPM blade speed, almost twice that of a gas walk mower. ([more info](#))

What do you like to do in your free time?
